

OSAMA PATHAN

MERN Stack Developer • Frontend Developer • UI Developer

8586046550 | osamapathan03@gmail.com

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

SUMMARY

MERN Stack Developer with strong frontend expertise in React and modern UI design. Builds full-stack web applications end-to-end — from responsive, component-driven interfaces to REST APIs, authentication, and database design with Node.js, Express, and MongoDB. Has shipped multiple production-style projects covering dashboards, AI-integrated tools, and e-commerce platforms, with a focus on clean architecture and reusable components. Comfortable owning a feature from UI to database.

SKILLS

Languages	JavaScript, HTML5, CSS3
Frontend	React.js, Redux Toolkit, Tailwind CSS, React Router
Backend	Node.js, Express.js
Database	MongoDB
Tools	Git, GitHub, VS Code, Vercel, Render, npm
Concepts	REST APIs, JWT Authentication, Responsive Design, State Management, Component Architecture

PROJECTS

FinPilot

AI-powered personal finance management platform built with the MERN stack.

- Built a full-stack MERN SaaS platform for personal finance management with transaction tracking, budgeting, and analytics dashboards
- Integrated Groq AI to generate personalized financial insights, monthly summaries, and savings recommendations
- Implemented JWT authentication with protected routes, password hashing, and secure cookie handling
- Built interactive data visualizations with Recharts to track income/expense trends and a financial health score

InterviewIQ

AI-powered mock interview and resume analysis platform.

- Built an AI-powered mock interview platform generating role-based technical questions with Groq AI-driven feedback
- Implemented resume analysis with ATS-style evaluation and missing-skills detection
- Designed JWT-authenticated user flows with protected routes and persistent interview history tracking
- Built a performance dashboard visualizing interview analytics and preparation progress over time

React Node.js Express MongoDB Tailwind CSS Groq AI

ShopSphere

Full-stack MERN e-commerce platform with authentication and order management.

- Built a full-stack MERN e-commerce platform with product browsing, search/filter, and detailed product pages
- Engineered a hybrid cart system merging guest (localStorage) and logged-in (MongoDB) carts automatically on login
- Built a JWT-authenticated checkout flow with shipping forms, order placement, and order history tracking
- Made a scoped decision to postpone unstable Razorpay payment integration to prioritize a stable core e-commerce workflow

WorkPilot

Multi-workspace project and task management app with Kanban, Calendar, and Activity tracking.

- Built a multi-workspace project management app with List, Kanban, Calendar, and Activity views using React and Redux Toolkit
- Implemented authentication with Clerk and persistent, user-specific state via LocalStorage (no backend)
- Designed a real-time stats dashboard tracking completion rate, task counts, and activity, with dark/light mode support
- Architected global state across 4 Redux slices (projects, tasks, organizations, activity) for a scalable, real-world SaaS-style structure
